INDIANA UNIVERSITY

Potential Savings with Collaborative Care Intervention for People with Alzheimer's Disease

From "JAMA" to Wishard in less than two years!

Shortening the Translational Cycle

- **Use the tools of Implementation Science:**
- **Create local social research networks**
- **Standardized data collection to serve:**
 - The clinic mission first
 - The research mission second
- **Use Information Technology to support**
 - Clinical decisions & needs
 - Research decisions & needs

The Reflective Adaptive Process of Implementation Science

- Vision, mission, and shared values
(Standardized Minimum Care)
- Time and space for learning and reflection (\$\$\$)
- Tension and discomfort are essential
- Diverse Discovery and Innovation teams
- Supportive leadership.

IDND Consultancy

- A group based problem-solving interaction model developed by the Hartford Foundation and IDND.
- Enable a set of people with a variety of knowledge and expertise to provide support, new perspectives, and ideas to one another, particularly around an important or difficult challenge.
